Service Level Agreement

This Service Level Agreement (SLA) describes the availability Acme Payments, Inc. commits to for the Acme Payments API and the service credits customers receive when that commitment is missed. It applies to customers on the Growth and Enterprise plans.

1. Service commitment

Acme Payments will use commercially reasonable efforts to make the Payments API available with a Monthly Uptime Percentage of at least 99.95% in each calendar month. Availability is measured by synthetic requests sent every minute from three regions to api.acme-payments.example.

2. Definitions

A minute counts as downtime when more than 5% of valid requests in that minute fail with a server error. The Monthly Uptime Percentage is the total number of minutes in the month minus the minutes of downtime, divided by the total number of minutes in the month.

3. Service credits

If the Monthly Uptime Percentage falls below the commitment, the customer is eligible for a service credit, calculated as a percentage of the monthly platform fees for the affected month:

Monthly Uptime Percentage	Service credit
Below 99.95% but at least 99.0%	10% of monthly fees
Below 99.0% but at least 95.0%	25% of monthly fees
Below 95.0%	50% of monthly fees

Service credits are the customer's sole remedy for unavailability. The total credit for a month never exceeds 50% of the monthly fees for that month.

4. Claiming a credit

To claim a service credit, contact support within 30 days of the end of the month in which the downtime occurred. Include the request ids and timestamps of failed requests. Approved credits are applied to the next invoice and cannot be exchanged for cash.

5. Exclusions

The commitment does not apply to unavailability caused by:

- Scheduled maintenance announced at least 48 hours in advance, up to 4 hours per month.
- Events outside our reasonable control, such as natural disasters.
- The customer's own systems, network or misuse of the API.
- Features labelled beta or preview, and test mode.

6. Support response times

Severity 1 means payments cannot be processed. Severity 2 means a feature is degraded but payments succeed. First response targets by plan:

Severity	Enterprise	Growth
Severity 1	15 minutes, 24/7	1 hour, 24/7
Severity 2	1 hour	4 business hours
Severity 3	4 business hours	1 business day

7. Incident communication

During a major incident Acme Payments posts updates on status.acme-payments.example at least every 30 minutes until the incident is resolved. A written post-incident report is published within 5 business days of resolution.

8. Changes to this SLA

Acme Payments may update this SLA with at least 90 days' notice. Changes never reduce the commitment during a customer's current subscription term.
